For Your Information

In order to maintain quality water at your home or business, we have adopted a fire hydrant Flushing program.

The purpose for this is to remove any sediment that may be in the distribution lines and to keep the water fresh.

Occasionally this exercise may cause the water in your house to become discolored.

If this happens open a faucet at the two furthest points of your house.

Let the water run for 5 to 10 minutes or until water runs clear.

This is one of the more visible jobs amongst others that you don't see that's done in order to supply you with clean and safe drinking water.

If you have any questions or concerns about the water please do not hesitate to call.

Between 7:00am to 3:00 pm 386-626-7176

After 3:00 pm to 7:00 am 386-626-7251

Mark Petracca
Water Production Superintendent
